

# University of Illinois at Chicago Demo

Platform: Oculus Rift DK2

*“Like all magnificent things, it’s very simple” – Natalie Babbitt*

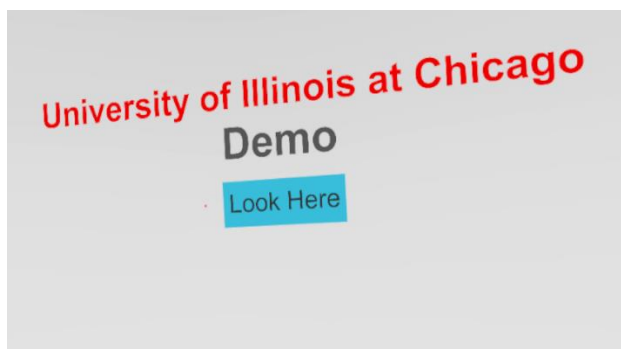

There are over 50 buildings that make up UIC’s East Campus scattered around multiple streets as you exit the CTA’s Blue Line from UIC/Halsted station from the Peoria St. Entrance, a common entrance used by many of the commuters on campus. It’s a common saying that “experience is the best teacher” and it’s the goal of this Virtual Reality interface to allow such an experience by guiding you across campus to your desired destination on campus. The interface is designed for simplicity and ease so that your actual visit on campus can be as seamless as possible.

Comfort Level: May be uncomfortable for users new to VR

## Controls:

Use Virtual Reticle (i.e. your gaze) to point to items and hold *Fire1* (right mouse button) to confirm selection. Press ESC to exit.
